

THE GLASS RACKING COMPANY

Innovation by Design

***Developing world leading glass
transportation solutions since 1991***

***...supported by efficient factory handling
solutions for glass and window manufacturers***

THE GLASS RACKING COMPANY

Innovation by Design

Glass Transportation

35 Foot 8 Wheel Glass Transporter
Our glass transporters span from large to small

118 inch Glass Trailer

76 x 114 inch Single Van

Van racks for Ford, Chevy, Dodge and imported brands. Options for single side, double side and internal racks.

8 Foot Pickup Triple Rack

Pick-up racks for all box lengths and box delete for all major brands. Options for single, double, triple and quad racks to suit your glass volume and weight requirements.

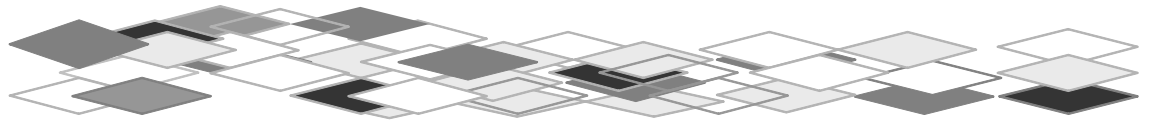

15 Foot Open Delivery Truck

Lightweight cab-over trucks to maximize glass load capacity. Large items on external racks, bulk storage of smaller items on internal racks.

By The Glass Racking Company focusing on the glass and fenestration industries, we understand our customers needs. We have developed an extensive suite of industry specific products. They are supported by processes and procedures to ensure that the benefit gained from investment in our solutions is maximized.

Our customer and industry relationships are vital to the ongoing development and improvement of our products. For this reason The Glass Racking Company is very customer focused through both our direct customer relationships and also via our network of service companies. Many of our solutions are tailored for specific customers.

The Glass Racking Company owns aluminum, plastic and rubber dies which provide components designed specifically for the glass and window industries. Our solutions built using these components have features not available through off the shelf componentry.

The Glass Racking Company Transport A-frame system uses Transport A-frames with a similar glass retention system to that used on our vehicles. This is quick to operate and very safe. A-frames are loaded onto specially designed vehicles with container lockdowns for quick and safe securing of the A-frames and load.

The Glass Racking Company has an extensive range of factory handing A-frames to meet the varying needs of glass and window factories. All have quality castors, hot dip galvanized finish, safety securing arms, and a strong steel structure. These are quality designed and manufactured factory tools for your business.

The Glass Racking Company solutions are built with features to suit the industry's that use them, like :

1. Lightweight racks utilizing T6 extruded aluminum to reduce vehicle weight, maximize payload, minimize fuel usage, and have both strength and longevity.
2. Mild steel componentry, either pre-galvanized or hot dip galvanized, for longevity and image.
3. Safety conscious design, like safety arms on all factory trolleys, spring loaded pole glass securing systems on all vehicles, and purpose built load securing systems for all Transport A-frame vehicles.
4. Protection of the glass through extensive use of polymers to avoid hard surfaces touching the product. All transport systems are designed and built to avoid product movement, transit rub and glass damage.

Transport A-frame System

43" x 35"

78" x 47"

78" x 74"

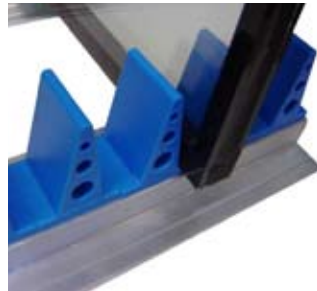

Harp

Factory Handling Trolleys

**Stoebe
Concertina rack systems**

Storage systems including concertina and swing racks to reduce floorspace requirements and reduce access times.

Tooth Storage System

Innovative IGU factory handling solutions to reduce damage and speed access to specific units.

Transport A-frames

Transport A-frames to reduce double handling by loading direct from the factory machinery to a vehicle.

Lightweight Crane System

Lightweight overhead rail crane systems for lifting between machinery, storage and A-frames.
